

Tools Coaching and Fidelity

Tier 1 – Abilities, LLC.

Training Objectives

- Overview of coaching and fidelity
- How to teach others to implement the Tools of Choice by effectively coaching
- Review of forms used
- Practice Process
- Review of data collected
- Questions and Answers

What is a Coach?

This may seem like a silly question, but it is important to remember the true definition:

A coach is a person who supports a learner in achieving a specific personal or professional goal, someone who gives instruction.

Who in your agency is a coach?

A Little Bit More About Coaches

- The coaches in your agency should always create a supportive environment for learning.
- They should be encouraging and helpful at applying new skills with fidelity.
- Feedback should always be given in a positive, productive way
- They should develop confidence in every person
- Set expectations early on
- Use the Tools of Choice at all times, and have a deep understanding of the practices
- Develop leaders/ mentors

What is a Mentor?

- A person who models, teaches, motivates the correct way in doing things
- Gives advice and direction
- Earns respect
- Fixes problems collaboratively
- Asks questions
- Inspires and develops people

Coaching VS. Mentoring

- Task Oriented
- Short Term
- Performance Driven
- Does Not Require Design

- Relationship Oriented
- Long Term
- Development Driven
- Requires a Design Phase

What is Fidelity?

Fidelity is:

Faithfulness to a person, cause, or belief, demonstrated by continuing loyalty and support.

- Accuracy in reporting detail
- Exactness
- Implemented as written, told

If we do not coach Tools to fidelity, then what?

- We take the risk of changing what Tools is meant for, and losing the why.
- Important elements may not be implemented as they were intended.
- The individuals we support quality of life may be impacted.
- EMT rates may rise.
- Time and money are lost in training staff.
- Agency moral drops
- The knowledge of the Tools of Choice material decreases

So, how do we do this thing called coaching?

- Ensure that the individuals we choose to be coaches have a very clear understanding of the Tools of Choice, and use it in their daily life.
 - They must **truly** believe in the Tools of Choice
- Coaches must be able to teach, model, and motivate in different ways to fit the person they are teaching to.
- Must be able to give room for growth and maintain a positive and encouraging relationship.

Reinforce, Reinforce, Reinforce

- As we know, positive reinforcement is powerful
- The more coaches reward efforts the more improvement we will see out of our staff

Requirements of a Coach?

- Must have had the 18 hour Tools of Choice class.
- Demonstrate Fidelity
- Kind and Caring all the time
- Understand the steps of all the Tools, fluent in Tools language without materials or prompts
- Able to collect accurate data using the fidelity check forms
- Able to explain clearly how the use of Tools can change the outcome of undesirable behaviors, serious behaviors, event reports, junk, etc.

How This May Look in an Agency Setting

- We currently have a Training Coordinator whose sole responsibility is to complete observations, model, role-play, give feedback, and debrief with all staff that have newly completed tools, staff whom took tools awhile ago and need a refresher, and even new staff.
- Our Training Coordinator acts as the coach and mentor for each home, and is developing a group of lead staff that will act as mentors when the Training Coordinator is not in the home.
- The Training Coordinator will soon have a team developed that will help coach Tools to fidelity across the agency

What steps does the Training Coordinator take to began the coaching process?

- The Training Coordinator (TC) spends 12-20 hours in the home observing staff and individual interactions.
- The TC takes notes and records SCC interactions on each staff in the home.
- The TC meets with the Assistant Director, Director, and Owner to develop a “game plan.”
 - Who needs the most help?
 - What are the home’s strengths and weaknesses?
 - What concerns or problems are very specific to that particular home?

Then what?

- The TC begins shadowing support staff in the home.
- One-to-one meetings are scheduled with the TC for staff who may need more help than others.
- The TC encourages SCC interactions – this may be by suggesting games, asking open ended questions, doing activities together, etc.
- When and if a crisis occurs, the TC deescalates the situation using Tools of Choice. After the situation is calm and individual is engaged with another staff, the TC debriefs the support staff: What was the support staff great at? What could have been said or done differently? What will we try next time?
- The TC continues to meet weekly with the agency administrators to provide updates and progress notes.
- The turnover rate and terminations for the specific home are tracked.

When Tools is Coached to Fidelity.....

- There is an increase in the overall knowledge of the Tools of Choice
- EMT rates lower, with a few expected “behavior bursts”
- Agency Moral sky rockets
- Importantly – the individuals we support have a much higher quality of life!

How will you know if you are making progress?

- It is important to collect data about EMT's, turnover rates, termination reasons, etc.
- All of this information can guide your agency – where are the problems? What do we need to address first? Where are we making progress and how are we doing that?

TURNOVER RATES FOR ABILITIES, LLC

- 2013 – 167%
- 2014 – 70%
- 2015 – 65%
- 2016 – *year to date* – 40%

Examples of Coaching Debriefing Forms for Separate Tools Skills

PIVOT Coaching Tool		USE REINFORCEMENT Coaching Tool	
Name _____ Date _____		Name _____ Date _____	
Using PIVOT		Using REINFORCEMENT	
STEPS of Pivot:		STEPS of Use Reinforcement:	
1. What junk behavior was occurring? Did you react to it with anything you said or tone of voice, facial expression or body language?	Describe the junk and your reaction:	1. Tell the person what behavior you liked if any doubt they will know: What did you say, or why was it obvious?	
2. What did you actively attend to... Another person? Who? Another activity? What? Same person, but something other than the junk behavior: What?	Describe what you did or said that showed your attention was on this other desirable or ok behavior:	2. Provide a consequence that matches the value of the behavior (Check any used) Praise Touch appropriate to situation Thing (Item) Privilege	Describe what you did to fulfill each step. What exactly did you say, do or give as reinforcement?
3. Pivot back: reinforce desirable behavior of the person within 10 seconds.	What was the ok or desired behavior you wanted to reinforce?	3. Use sincere and appropriate facial expressions, tone of voice and body language.	Describe what you did to fulfill this step: What position was your body in, were you smiling, laughing, etc.
4. Repeat as much as necessary for as long as necessary.	How many times did you pivot during this session of junk behavior?	4. Avoid reacting to junk behavior	What junk behavior did you get, if any?
5. Stay cool, Avoid coercion.	How did this episode of junk behavior and pivot end? Any problems? Did you catch yourself starting to use coercions?	5. Stay cool, Avoid coercion.	How did the person react to your reinforcement? Did you catch yourself starting to use coercions?
Any Thoughts, Comments or Questions:		6. Make sure that the consequence you used is actually reinforcing.	What makes you think your reinforcement was actually reinforcing? Will you need time to determine this?

Competency and Maintenance of Tools Skills Coaching Tool

Observed by: _____ Person observed: _____ Situation: _____
 Opportunities for tool use (tally number of opportunities) _____ UR _____ P _____ SE _____ SCH _____ C _____

Date of observation (each column is one observation date)									
Stay Close-Cool/Routine/Random	Yes	No	Yes	No	Yes	No	Yes	No	Yes
1. Move toward the person and remain within arm's reach.									
2. Touch if appropriate to the situation									
3. Use caring facial expressions									
4. Use caring tone of voice -not neutral or monotone									
5. Relaxed body language (relaxed, arms open, looking at)									
6. Ask Open-Ended, positive questions.									
7. Use empathy statements									
8. Use Encouragement									
9. Listen- Talk less, Do not interrupt or change the topic									
Use Reinforcement	Yes	No	Yes	No	Yes	No	Yes	No	Yes
1. Tell the person what behavior you liked (if appropriate).									
2. Provide a consequence that matches the value of behavior- Social, Praise, Touch, Tangible, Privilege									
3. Provide the consequence within 3 seconds									
4. Appropriate facial expressions, tone & body language.									
Pivot	Yes	No	Yes	No	Yes	No	Yes	No	Yes
1. Don't react to junk behavior with tone of voice, facial expressions, body language, or words.									
2. Actively attend to something desirable (behavior of the person, another person, or an activity).									
3. Pivot back; reinforce desirable behavior of the person within 10 seconds (unless doing pivot on the person).									
4. Repeat as much as necessary for as long as necessary.									
Set Expectations	Yes	No	Yes	No	Yes	No	Yes	No	Yes
Part I: Set the Expectation									
1. Set the stage. Choose a good time and place									
2. Begin positively.									
3. Give a statement of concern and encouragement.									
4. State the expectation- clearly and specifically									
5. Briefly explain the benefits of this expectation									
Part II: Set the Consequences									
6. State the consequences for meeting & not meeting									
7. Negotiate as necessary.									
8. Ask to restate the expectation & consequences.									
9. Acknowledge and praise the restatement.									
10. Make sure that all caretakers involved are aware									
Stay Close – HOT	Yes	No	Yes	No	Yes	No	Yes	No	Yes
1. Move toward the person and remain within arm's reach.									
2. Touch appropriate to the situation									
3. Express caring and concern appropriate to the situation.									
4. Use caring tone of voice and relaxed body language.									
5. Ask open-ended questions									
6. Listen- Talk less, no problem-solving, not interrupt or change the topic. Talk less than the person.									
7. Use empathy statements									
8. Encourage									
9. Repeat as necessary until the person is ready for the next step.									
10. Redirect to calming, replacement behavior, or problem solving if asked

On-Site Observation

On-Site Observation Activity

Name _____ Date/Time _____

ID# _____ FLS/Supervisor _____

Goal: With minimal interaction with staff or individuals, observe the environment and reflect on the following supports within the home.

People: (i.e. who is there? Peer DSP, front line supervisor, DSN executive team member, individuals served, repair/delivery workers, DMH-OD support coordinator, etc.)

Describe their communication styles: (i.e. verbal- loud/limited/quiet/intimidating, physical- body positioning, movements, use of gestures or signs, alternative communication devices, etc.)

Physical space: (i.e. furniture placement, interior and exterior doors, corners, best visual location for observation/physical safety, size of rooms relative to number of people, organization of supplies/belongings, etc.)

Sound and Senses: (i.e. odors/smells, outside noises, music or television, volume and tone of individuals and staff present, etc.)

Visual Supports: (i.e. placement/accessibility of activity suggestions, calendars, schedules, skill/task breakdown, intended audience- staff or individual?)

On-Site Observation Activity

Describe a Stay Close Cool, Random or Routine interaction you observed:

1. Open-Ended Questions (What's up? How's it going? Tell me all about it!, etc.) :

Response of individual (i.e. tone of voice, body language, facial expression, etc.):

2. Empathy Statements (i.e. excited, surprised, happy, relaxed, calm, etc.):

Response of individual (i.e. facial expression, body language, tone of voice, etc.):

3. Encouragement (i.e. what future skill/activity/goal did staff relate to the desirable behavior):

Response of individual (i.e. facial expression, body language, tone of voice, etc.):

List three examples of junk behavior of the supported individuals observed (behavior that is undesirable but is NOT physically harmful to themselves, others, property or is illegal):

1. _____
2. _____
3. _____

Describe the response from staff and/or others (peers, bystanders, etc.) in the environment to the junk behavior:

1. _____
2. _____
3. _____

Incident Review

BMT Scenario

This scenario is true, only (and only) the names have been changed to protect privacy. There are no spelling or grammar changes made throughout these scenarios. Konny and Kondra are completely fictional and loosely based on the characters created for the cable show, "South Park".

Staff was picking up consumers at Day Program. Staff got Kondra first. As Kondra was getting into the van, informed staff of incident that happened earlier in the day with Konny. Kondra stated that (another individual) hit her with basketball in the chest. Staff asked if she was alright. Kondra stated that she was, but not wanting to deal with Konny any time soon. Staff then positioned the van to get Konny in van and seat belt on. Day Program staff informed ISL staff what had happened earlier that day. Konny overheard, then got angry and started to cuss at Kondra. Kondra started to talk back to Konny. Staff tried to calm both down. Kondra stopped, but Konny kept on. Konny stated that he didn't want to ride with Kondra, that he would walk home before he ride with her. Konny proceeded to take off seat belt and got out of van. Staff tried to calm him down and asked him to put his seat belt back on. Konny throw a punch at ISL staff and hit staff in chest. ISL staff stopped back asking Konny to calm down. Konny stood up and began to kick at staff. Konny fell back in seat and started to punch ISL staff again in chest. ISL staff yelled for help to Day Program staff that was standing outside watching. Staff yelled twice. Day Program staff came to help Konny calm down. Konny got even more angry. He cussed at Kondra and ISL staff. Day Program staff took him as far as the rail going toward door to Day Program. Konny had 5 Day Program staff around him to calm him down. Konny was so angry that while he was cussing and yelling he was hanging onto rail, but pulling so hard that he loosened the rail. Konny was not calming down. He stated that he was going to kill Kondra and stated how he was going to do it. Day Program staff continued to try to calm him. ISL staff waited to see if Konny was calm, but no. ISL staff called house manager to inform what was going on and would probably be late returning home. House manager instructed ISL staff to call QDOP inform what was going on. ISL staff called twice, got answering machine. ISL staff waited for return call. ISL staff decided to call ISL house manager again. House manager suggested to call 911 and ask for the CIT officer who deals with behavior. ISL staff verified with Day Program staff. Day Program staff called 911 and took Konny inside. ISL staff informed house manager bringing rest of consumers home.

Take the COACHING Plunge!

- What do you have to lose... other than time, money, and employees?!
- Our Director estimates that we have saved nearly \$300,000 in hiring, interviewing, orientating, and overhead/materials cost by reducing our turnover rate.
- Staff retention is increasing – 25%+ of our Direct Support employees have been with us for more than 1 year (this is up from approximately 15% one year ago)
